Notes: ADF = Average Daily Influent Flow as directly measured at the treatment plants.
ADDWF = Average Daily Dryweather Flow as indirectly determined by I/I analysis
Average Daily Billed Flow based on City Sewer Billing monthly records and includes residential/commercial accounts, wholesale customers, and large industrial users.
MLGW would not include private wells and other utilities.

NOTES

1. American Yeast did not start taking biogas until Feb 2009.
2. Henry Hub price is per 1 million BTUs.
3. CF = Cubic Feet

Note:

The plants participated in the Economy Surplus Power (ESP) from program was from 1991 to 2000. From 2000 to 2006, the plants participated in the Variable Price Interruptible (VPI) program. Since 2006, both treatment plants have been in the Firm Power program. Began participating in ENERNOC in 2013.

Dewatering	Switch Gear	GX: Severe	>20,000	>20,000	>20,000	>20,000	>20,000	>20,000	28	55

Notes: ISA Class G2: Moderate is effects of corrosion measurable and may be a factor in determining equipment reliability. Possible effects in less than 5 years.

ISA Class G3: Harsh is high probability that corrosion attack will occur, Probable effect on equipment reliability in less than 5 years.

ISA Class GX: Electronic/electrical equipment not expected to survive due to corrosive attack.

"Cu" is Copper

"Ag" is Silver

"Å" is Angstrom or 0.0000000001 meter.

Maximum limit for Cu and Ag corrosion tests is 20,000 Å. Corrosion >20,000 Å cannot be accurately evaluated
